Proven The Best

Decades of research by Farmers, Universities and the USDA prove this is the best way to grow plants.

Over the past 45 years farmers and researchers have developed a unique growing system that increased vegetable production by and incredible 147%. How? They refined the way water, air and fertilizer is provided for the plants. Now this same technology is available for home gardeners. Exactly the same technique professionals use in the fields is built-in to every Garden PatchTM Grow BoxTM. The result? Your plants will flourish, blossom and bear fruit like you've never even dreamed of. Even first-time gardeners will grow vegetables and flowers like a pro – guaranteed.
