My GrowBox Doesn’t Fit Together Correctly

Set Up Problems · https://www.agardenpatch.com/customer-center/my-growbox-doesnt-fit-together-correctly/

The GrowBox™ can have some warping during shipping, especially during the hot summer months. If this happens simply put your GrowBox™ in a bathtub of warm water to give it some flexibility so you can get it together. Once the top and bottom pieces are snapped together you won’t have to worry about it again.
